SUBJECT INDEX

Volumes 18-19, 1972

1. ATMOSPHERIC POLLUTION FROM COMBUSTION

Correct Turbulence—A Way to Reduce the Concentration of Unburnt Hydrocarbons from Automotive Engines, 18, 461

Oxidation of Sulfur Dioxide in Stainless Steel or Inconel Sampling Probes, 18, 469

NO_x Formation in Combustion, 19, 69

Kinetics of the Sulphur Dioxide Catalyzed Recombination of Radicals, in Hydrogen Flames, 19, 227

Formation of Nitric Oxide from Fuel Nitrogen in Ethylene Flames, 19, 289

The Role of Mixing in Burner-Generated Carbon Monoxide and Nitric Oxide, 19, 407

2. BURNING OF LIQUIDS

Ignition Delay Measurements in Two-Phase Detonations, 18, 53

High-Pressure Liquid-Monopropellant Strand Combustion, 18, 103

Combustion of Single Drops of Fuel, 18, 159

A Dimensionless Correlation of Pool Burning Data, 18, 381

Cellular and Turbulent Ceiling Fires, 18, 389

An Analysis of the Chemico-Kinetic Nature of Ignition of Liquid Fuels and the Effect of Physical Factors, 18, 417

Decomposition and Hybrid Combustion of Hydrazine, MMH, UDMH as Droplets in a Combustion Gas Environment, 19, 213

Some Observations on Experimental Fires in Enclosures. Part II: Ethyl Alcohol and Paraffin Oil, 19, 363

Kinetics and Convection in the Combustion of Alkane Droplets, 19, 393

The Role of Mixing in Burner-Generated Carbon Monoxide and Nitric Oxide, 19, 407

3. BURNING OF SOLIDS

Thermal Decomposition Kinetics of Wood Pyrolysis, 18, 75

Radiant Ignition of a Reactive Solid with In-Depth Absorption, 18, 85

Measured Temperatures of Burning Pulverized-Fuel Particles, and the Nature of the Primary Reaction Product, 18, 173

A Mathematical Model of Wood Pyrolysis, 18, 185

The Active Combustion Mechanism of Single Al and Zr Strands in Oxygen as Determined by High Speed Photography, 18, 337

Cellular and Turbulent Ceiling Fires, 18, 389

Prediction of Ignition Temperature of a Single Coal Particle, 18, 411

Some Observations on Experimental Fires in Enclosures. Part I: Cellulosic Materials, 19, 101

Soot Oxidation in Laminar Hydrocarbon Flames, 19, 249

4. COMBUSTION IN PRACTICAL SYSTEMS

Knock Suppression in Petrol Engines, 18, 167

Emission-Absorption Temperature Measurements in the Cylinder of a Spark Ignition Engine, 18, 315

An Analysis of the Chemico-Kinetic Nature of Ignition of Liquid Fuels and the Effect of Physical Factors, 18, 417

Combustion Roar of Premixed Burners, Singly and in Pairs, 18, 435

Correct Turbulence—A Way to Reduce the Concentration of Unburnt Hydrocarbons from Automotive Engines, 18, 461

Minimum Ignition Energy Studies with Unflanged Electrodes, 19, 309

Carbonyl Formation from Isooctane Combustion in an Internal Combustion Engine, 19, 455

5. CRITICAL REVIEWS

Determination of Burning Velocities: A Critical Review, 18, 133

The Kinetics of Combustion of Gaseous Sulphur Compounds—A Review, 18, 225

Applications of Combustion Theory to Biological Systems, 18, 439

6. DEFLAGRATION WAVES

Determination of Burning Velocities: A Critical Review, 18, 133

The Laminar Flame Velocities of Propane/Ammonia Mixtures, 18, 471

Comment on "The Deflagration of Single Crystals of Ammonium Perchlorate," 19, 131

7. DETONATION WAVES

- Chemi-Ionization in Detonation Chemistry, 18, 99
Experimental Investigation of the Detonation Properties of Hydrogen-Oxygen and Hydrogen-Nitric Oxide Mixtures at Initial Pressures up to 40 Atmospheres, 19, 141
Ignition Delay Measurements in Two-Phase Detonations, 18, 53
The Development of Instabilities in a Shocked Exothermic Gas Flow, 18, 59
On the Instability of H_2-Cl_2 Gaseous Detonations, 18, 321
The Effect of Small Amounts of Benzene on Oxy-Acetylene, 19, 449

8. DIFFUSION FLAMES

- Optical Study of Counterflow Diffusion Flames in Transverse Electric Fields, 19, 113
On the Deviation of the Flame from the Stagnation Point in Opposed-Jet Diffusion Flames, 19, 171
A Mathematical Model of the Opposed-Jet Diffusion Flame: Effect of an Electric Field on Concentration and Temperature Profiles, 19, 351

9. ELECTRICAL ASPECTS OF FLAMES

- Comparison of Single- and Double-Probe Measurements of Electron Temperatures in Flames, 18, 65
Chemi-Ionization in Detonation Chemistry, 18, 99
Competitive Reaction Kinetics in Seeded Flames and Rocket Exhausts, 18, 217
The Effect of Direct Electric Fields on Normal Burning Velocity, 18, 296
Optical Study of Counterflow Diffusion Flames in Transverse Electric Fields, 19, 113
The Effect of Electric Fields on Burning Velocity, 19, 135
Electron Energy Exchanges in Hydrocarbon Flames, 19, 237
Characteristics of Premixed, Laminar CO/N_2O Flames, 19, 257
Initiation of Electrically Augmented Flames, 19, 305
The Ionization Potentials of $CaOH$ and $SrOH$, 19, 306
A Mathematical Model of the Opposed-Jet Diffusion Flame: Effect of an Electric Field on Concentration and Temperature Profiles, 19, 351

10. EXPERIMENTAL TECHNIQUES

- Diameter Effects in Cooled-Flat-Flame Burners, 18, 13
The Ignition of Flammable Atmospheres by Small Amounts of Metal Vapor and Particles, 18, 19

- Comparison of Single- and Double-Probe Measurements of Electron Temperatures in Flames, 18, 65

- Determination of Burning Velocities: A Critical Review, 18, 133

- Use of Sunlight-Shadowgraphs in Aerial Photogrammetry of Blast Waves, 18, 155

- Measured Temperatures of Burning Pulverized-Fuel Particles, and the Nature of the Primary Reaction Product, 18, 173

- The Application of Optical Anemometry to Measurement in Combustion Systems, 18, 197

- Emission-Absorption Temperature Measurements in the Cylinder of a Spark Ignition Engine, 18, 315

- Effect of Concentration Gradient on Composition of Sampled Gas. I. Theoretical Analysis, 18, 347

- Application of Chemiluminescence Measurement to the Study of Turbulent Flame Structure, 18, 429

- Oxidation of Sulfur Dioxide in Stainless Steel or Inconel Sampling Probes, 18, 469

- Effect of Concentration Gradient on Composition of Sampled Gas. II. Experimental Verification, 19, 1

- Measurements of Burning Velocity in a Flat Flame Front, 19, 49

- The Effect of Electric Fields on Burning Velocity, 19, 135

- Dispersion in Combustion Gas Sampling Probes, 19, 267

- The Burning Velocity of Methane-Air Mixtures, 19, 275

- Initiation of Electrically Augmented Flames, 19, 305

- Carbonyl Formation from Isooctane Combustion in an Internal Combustion Engine, 19, 455

11. EXPLOSIVES

- A New Method of Predicting the Critical Temperature of Explosives for Various Geometries, 18, 403

- Flow, Melting and Ignition of Solid Explosives under Impact, 18, 473

- Fireball and Shock Wave Anomalies Observed in Chemical Explosions, 19, 25

- Predicting the Critical Boundary Temperature of Multidimensional Explosives, 19, 331

- Shock Initiation of Fast Decomposition in Crystalline Solids, 19, 419

12. FIRE PHENOMENA

- Thermal Decomposition Kinetics of Wood Pyrolysis, 18, 75

- The Spectral Distribution of Radiant Energy of a Gas-Fired Radiant Panel and Some Diffusion Flames, 18, 125

A Dimensionless Correlation of Pool Burning Data, 18, 381

Cellular and Turbulent Ceiling Fires, 18, 389

Measuring the Energy-Release Rate of a Spreading Fire, 19, 17

Thermal Ignition in Two-Component Systems. Part II—Experimental Study, 19, 55

Some Observations on Experimental Fires in Enclosures. Part I—Cellulosic Materials, 19, 101

Some Observations on Experimental Fires in Enclosures. Part II—Ethyl Alcohol and Paraffin Oil, 19, 363

13. FLAME IGNITION

The Effect of Burning Velocity Inhibitors on the Ignition of Hydrocarbon-Oxygen-Nitrogen Mixtures, 18, 3

The Ignition of Flammable Atmospheres by Small Amounts of Metal Vapor and Particles, 18, 19

Ignition Delay Measurements in Two-Phase Detonations, 18, 53

Shock Tube Investigations of Ignition in Ethane-Oxygen-Argon Mixtures, 18, 115

Reaction of Hydrocarbon-Air Mixtures in Incident Shock Waves of Pressure Greater than 25 Atmospheres: Correlation with Shock-Tube Results, 18, 305

Auto-Ignition of Hydrocarbons behind Reflected Shock Waves, 18, 327

Prediction of Ignition Temperature of a Single Coal Particle, 18, 411

An Analysis of the Chemico-Kinetic Nature of Ignition of Liquid Fuels and the Effect of Physical Factors, 18, 417

Flow, Melting and Ignition of Solid Explosives under Impact, 18, 473

Thermal Ignition in Two-Component Systems. Part II—Experimental Study, 19, 55

The Effect of Additives on Low-Temperature Hydrocarbon Ignition in a Flow System, 19, 81

Experimental Investigation of the Detonation Properties of Hydrogen-Oxygen and Hydrogen-Nitric Oxide Mixtures at Initial Pressures up to 40 Atmospheres, 19, 141

A Nondimensional Parameter Characterizing Mixing Processes in a Model of Thermal Gas Ignition, 19, 181

Ignition in a Transient Turbulent Jet of Hot Inert Gas, 19, 187

Minimum Ignition Energy Studies with Unflanged Electrodes, 19, 309

Multistage Ignition in Hydrocarbon Combustion, 19, 311

The Cool-Flame Oxidation of *n*-Heptane. Part I. The Kinetic Features of the Reaction, 19, 315

The Effect of Higher Alkanes on the Ignition of Methane-Oxygen-Argon Mixtures in Shock Waves, 19, 373

14. FLAME INHIBITION

The Effect of Burning Velocity Inhibitors on the Ignition of Hydrocarbon-Oxygen-Nitrogen Mixtures, 18, 3

Knock Suppression in Petrol Engines, 18, 167

The Effect of Pressure on the Inhibition of Ethylene Flames, 18, 300

The Effect of Additives on Low-Temperature Hydrocarbon Ignition in a Flow System, 19, 81

15. FLAME PROPAGATION

The Effect of Burning Velocity Inhibitors on the Ignition of Hydrocarbon-Oxygen-Nitrogen Mixtures, 18, 3

Diameter Effects in Cooled-Flat-Flame Burners, 18, 13

Solutions of the One-Dimensional Laminar Flame Propagation Equations, 18, 43

Determination of Burning Velocities: A Critical Review, 18, 133

The Effect of Direct Electric Fields on Normal Burning Velocity, 18, 296

The Burning Velocities of Near Limit Mixtures of Propane, Air, and Hydrogen Bromide, 18, 203

The Effect of Pressure on the Inhibition of Ethylene Flames, 18, 300

The Laminar Flame Velocities of Propane/Ammonia Mixtures, 18, 471

Measurements of Burning Velocity in a Flat Flame Front, 19, 49

The Laminar Flame Speed of Methane-Oxygen Mixtures and Some Remarks on Flame Pressure, 19, 136

Experimental Investigation of the Detonation Properties of Hydrogen-Oxygen and Hydrogen-Nitric Oxide Mixtures at Initial Pressures up to 40 Atmospheres, 19, 141

Amplification of Turbulence Level by a Flame and Turbulent Flame Velocity, 19, 203

Decomposition and Hybrid Combustion of Hydrazine, MMH and UDMH as Droplets in a Combustion Gas Environment, 19, 213

Characteristics of Premixed, Laminar CO/N₂O Flames, 19, 257

The Burning Velocity of Methane-Air Mixtures, 19, 275

Flame Propagation in a Vortex Core, 19, 297

16. FLAME SPECTRA AND EXCITED SPECIES

The Spectral Distribution of Radiant Energy of a Gas-Fired Radiant Panel and Some Diffusion Flames, 18, 125

Discussion of the Thermal State of an Open Air Premixed Methane-Oxygen Flame, 19, 11

Spectral and Total Emissivity of Water Vapor and Carbon Dioxide, 19, 33

Electron Energy Exchanges in Hydrocarbon Flames, 19, 237

Characteristics of Premixed, Laminar $\text{CO}/\text{N}_2\text{O}$ Flames, 19, 257

17. FLAME STABILITY

A Theoretical Model for Stable Combustion inside a Refractory Tube, 18, 27

Stabilization of Flames in Refractory Tubes, 18, 37

The Burning Velocities of Near Limit Mixtures of Propane, Air, and Hydrogen Bromide, 18, 203

On the Instability of H_2 - Cl_2 Gaseous Detonations, 18, 321

A Flame Structure Study of the Stabilizing Region of a Fuel-Rich Flame and the Effects of Vitiation, 19, 89

Flame Stabilization at Multiple Cylindrical Ports, 18, 476

18. FLAME STRUCTURE

Structure of Premixed Turbulent Flame, 18, 303

Application of Chemiluminescence Measurement to the Study of Turbulent Flame Structure, 18, 429

A Flame Structure Study of the Stabilizing Region of a Fuel-Rich Flame and the Effects of Vitiation, 19, 89

On the Deviation of the Flame from the Stagnation Point in Opposed-Jet Diffusion Flames, 19, 171

A Mathematical Model of the Opposed-Jet Diffusion Flame: Effect of an Electric Field on Concentration and Temperature Profiles, 19, 351

19. FLUID DYNAMICS AND COMBUSTION

Ignition Delay Measurements in Two-Phase Detonations, 18, 53

The Development of Instabilities in a Shocked Exothermic Gas Flow, 18, 59

The Burning Velocities of Near Limit Mixtures of Propane, Air, and Hydrogen Bromide, 18, 203

Chemical Effects on Sound Propagation, 18, 207

Auto-Ignition of Hydrocarbons behind Reflected Shock Waves, 18, 327

Fireball and Shock Wave Anomalies Observed in Chemical Explosions, 19, 25

Amplification of Turbulence Level by a Flame and Turbulent Flame Velocity, 19, 203

Flame Propagation in a Vortex Core, 19, 297

Kinetics and Convection in the Combustion of Alkane Droplets, 19, 393

The Role of Mixing in Burner-Generated Carbon Monoxide and Nitric Oxide, 19, 407

20. FLAME RADIATION

The Spectral Distribution of Radiant Energy of a Gas-Fired Radiant Panel and Some Diffusion Flames, 18, 125

Application of Chemiluminescence Measurement to the Study of Turbulent Flame Structure, 18, 429

Spectral and Total Emissivity of Water Vapor and Carbon Dioxide, 19, 33

21. HETEROGENEOUS COMBUSTION

Knock Suppression in Petrol Engines, 18, 167

Measured Temperatures of Burning Pulverized-Fuel Particles, and the Nature of the Primary Reaction Product, 18, 173

The Active Combustion Mechanism of Single Al and Zr Strands in Oxygen as Determined by High Speed Photography, 18, 337

A Dimensionless Correlation of Pool Burning Data, 18, 381

Cellular and Turbulent Ceiling Fires, 18, 389

Prediction of Ignition Temperature of a Single Coal Particle, 18, 411

An Analysis of the Chemico-Kinetic Nature of Ignition of Liquid Fuels and the Effect of Physical Factors, 18, 417

Thermal Ignition in Two-Component Systems. Part II—Experimental Study, 19, 55

Soot Oxidation in Laminar Hydrocarbon Flames, 19, 249

22. KINETICS AND MECHANISMS OF COMBUSTION REACTIONS

The Effect of Burning Velocity Inhibitors on the Ignition of Hydrocarbon-Oxygen-Nitrogen Mixtures, 18, 3

Boundary-Value Solutions of the One-Dimensional Laminar Flame Propagation Equations, 18, 43

Shock Tube Investigations of Ignition in Ethane-Oxygen-Argon Mixtures, 18, 115

Chemical Effects on Sound Propagation, 18, 207

Competitive Reaction Kinetics in Seeded Flames and Rocket Exhausts, 18, 217

The Kinetics of Combustion of Gaseous Sulphur Compounds—A Review, 18, 225

The Effect of Nitric Oxide on the Recombination of H Atoms in Fuel-Rich Propane-Oxygen-Nitrogen Flames, 18, 293

The Oxidation of 2-Butenes During the Induction Period, 18, 357

Spontaneous Ignition Supported by Chlorine Dioxide. I. Chlorine Dioxide Alone and with Diluents, 18, 361

NO_x Formation in Combustion, 19, 69

The Effect of Additives on Low-Temperature Hydrocarbon Ignition in a Flow System, 19, 81

Spontaneous Ignition Supported by Chlorine Dioxide. II. Self Heating in Chlorine Dioxide Plus Hydrocarbons, 19, 117

Formation of Hydrogen from Amine Oxidation and Pyrolysis, 19, 134

- Kinetics of the Sulphur Dioxide Catalyzed Recombination of Radicals in Hydrogen Flames, 19, 227
- Formation of Nitric Oxide from Fuel Nitrogen in Ethylene Flames, 19, 289
- The Gas-Phase Reaction of Perchloric Acid with Hydrogen, 19, 343
- Shock-Tube Studies on the Ignition of Ethylene-Oxygen-Argon Mixtures, 19, 347
- The Effect of Higher Alkanes on the Ignition of Methane-Oxygen-Argon Mixtures in Shock Waves, 19, 373
- The Role of Pyrolysis Reactions in Hydrocarbon Oxidation, 19, 452
- Carbonyl Formation from Isooctane Combustion in an Internal Combustion Engine, 19, 455
- 23. LIMITS OF FLAMMABILITY**
- The Burning Velocities of Near Limit Mixtures of Propane, Air, and Hydrogen Bromide, 18, 203
- 24. LIMITS OF SPONTANEOUS IGNITION**
- Spontaneous Ignition Supported by Chlorine Dioxide. I. Chlorine Dioxide Alone and with Diluents, 18, 361
- A New Method of Predicting the Critical Temperature of Explosives for Various Geometries, 18, 403
- The Effect of Additives on Low-Temperature Hydrocarbon Ignition in a Flow System, 19, 81
- Spontaneous Ignition Supported by Chlorine Dioxide. II. Self Heating in Chlorine Dioxide Plus Hydrocarbons, 19, 117
- Self-Heating during the Spontaneous Ignition of Methyl Nitrate Vapor, 19, 157
- Multistage Ignition in Hydrocarbon Combustion, 19, 311
- The Cool-Flame Oxidation of *n*-Heptane. Part I. The Kinetic Features of the Reaction, 19, 315
- Predicting the Critical Boundary Temperature of Multidimensional Explosives, 19, 331
- Explosive Systems with Reactant Consumption. I. Critical Conditions, 19, 435
- Explosive Systems with Reactant Consumption. II. Stability, 19, 445
- 25. MODELING AND SCALING IN COMBUSTION PROCESSES**
- A Theoretical Model for Stable Combustion Inside a Refractory Tube, 18, 27
- Boundary-Value Solutions of the One-Dimensional Laminar Flame Propagation Equations, 18, 43
- Thermal Decomposition Kinetics of Wood Pyrolysis, 18, 75
- Radiant Ignition of a Reactive Solid with In-Depth Absorption, 18, 85
- High-Pressure Liquid-Monopropellant Strand Combustion, 18, 103
- Combustion of Single Drops of Fuel, 18, 159
- A Mathematical Model of Wood Pyrolysis, 18, 185
- Effect of Concentration Gradient on Composition of Sampled Gas. I. Theoretical Analysis, 18, 347
- The Rate of Decomposition of Silica Particles in an Augmented Flame, 18, 373
- A Dimensionless Correlation of Pool Burning Data, 18, 381
- A New Method of Predicting the Critical Temperature of Explosives for Various Geometries, 18, 403
- An Analysis of the Chemico-Kinetic Nature of Ignition of Liquid Fuels and the Effect of Physical Factors, 18, 417
- Combustion Roar of Premixed Burners, Singly and in Pairs, 18, 435
- Applications of Combustion Theory to Biological Systems, 18, 439
- Measuring the Energy-Release Rate of a Spreading Fire, 19, 17
- Some Observations on Experimental Fires in Enclosures. Part I: Cellulosic Materials, 19, 101
- On the Deviation of the Flame from the Stagnation Point in Opposed-Jet Diffusion Flames, 19, 171
- A Nondimensional Parameter Characterizing Mixing Processes in a Model of Thermal Gas Ignition, 19, 181
- Ignition in a Transient Turbulent Jet of Hot Inert Gas, 19, 187
- Amplification of Turbulence Level by a Flame and Turbulent Flame Velocity, 19, 203
- Dispersion in Combustion Gas Sampling Probes, 19, 267
- Predicting the Critical Boundary Temperature of Multidimensional Explosives, 19, 331
- A Mathematical Model of the Opposed-Jet Diffusion Flame: Effect of an Electric Field on Concentration and Temperature Profiles, 19, 351
- Some Observations on Experimental Fires in Enclosures. Part II: Ethyl Alcohol and Paraffin Oil, 19, 363
- Acoustic Amplification during Solid Propellant Combustion, 19, 379
- Kinetics and Convection in the Combustion of Alkane Droplets, 19, 393
- The Role of Mixing in Burner-Generated Carbon Monoxide and Nitric Oxide, 19, 407
- Explosive Systems with Reactant Consumption. I. Critical Conditions, 19, 435
- Explosive Systems with Reactant Consumption. II. Stability, 19, 445
- 26. NEW APPLICATIONS OF COMBUSTION**
- Applications of Combustion Theory to Biological Systems, 18, 439

27. PROPELLANTS

High-Pressure Liquid-Monopropellant Strand Combustion, **18**, 103

Comment on "The Deflagration of Single Crystals of Ammonium Perchlorate," **19**, 131

Vacuum Thermal Decompositions of the Nitrate Salts of Hydrazine, **19**, 144

Acoustic Amplification during Solid Propellant Combustion, **19**, 379

28. SOOTING

Soot Oxidation in Laminar Hydrocarbon Flames, **19**, 249

A Model for Sooting in Diffusion Flames, **19**, 427

29. SUPERSONIC REACTING FLOW

The Development of Instabilities in a Shocked Exothermic Gas Flow, **18**, 59

Reaction of Hydrocarbon-Air Mixtures in Incident Shock Waves of Pressure Greater than 25 Atmospheres: Correlation with Shock-Tube Results, **18**, 305

30. THERMAL DECOMPOSITION PROCESSES

Thermal Decomposition Kinetics of Wood Pyrolysis, **18**, 75

Spontaneous Ignition Supported by Chlorine Dioxide. I. Chlorine Dioxide Alone and with Diluents, **18**, 361

The Rate of Decomposition of Silica Particles in an Augmented Flame, **18**, 373

Vacuum Thermal Decompositions of the Nitrate Salts of Hydrazine, **19**, 144

Self-Heating during the Spontaneous Ignition of Methyl Nitrate Vapor, **19**, 157

Decomposition and Hybrid Combustion of Hydrazine, MMH and UDMH as Droplets in a Combustion Gas Environment, **19**, 213

A Model for Sooting in Diffusion Flames, **19**, 427

31. THERMOCHEMISTRY AND THERMODYNAMICS

Identification of Lead Compounds in Flames and Determination of the PbO Bond Energy, **19**, 197

The Ionization Potentials of CaOH and SrOH, **19**, 306

32. TRANSIENT SPECIES

The Effect of Nitric Oxide on the Recombination of H Atoms in Fuel-Rich Propane-Oxygen-Nitrogen Flames, **18**, 293

NO_x Formation in Combustion, **19**, 69

Identification of Lead Compounds in Flames and Determination of the PbO Bond Energy, **19**, 197

Kinetics of the Sulphur Dioxide Catalyzed Recombination of Radicals in Hydrogen Flames, **19**, 227

Characteristics of Premixed, Laminar CO/N₂O Flames, **19**, 257

Dispersion in Combustion Gas Sampling Probes, **19**, 267

The Ionization Potentials of CaOH and SrOH, **19**, 306

33. TURBULENCE IN FLAMES

The Application of Optical Anemometry to Measurement in Combustion Systems, **18**, 197

Structure of Premixed Turbulent Flame, **18**, 303

Application of Chemiluminescence Measurement to the Study of Turbulent Flame Structure, **18**, 429

Combustion Roar of Premixed Burners, Singly and in Pairs, **18**, 435

Correct Turbulence—A Way to Reduce the Concentration of Unburnt Hydrocarbons from Automotive Engines, **18**, 461

Amplification of Turbulence Level by a Flame and Turbulent Flame Velocity, **19**, 203

The Role of Mixing in Burner-Generated Carbon Monoxide and Nitric Oxide, **19**, 407

Combustion and Flame

THE JOURNAL OF THE COMBUSTION INSTITUTE

Volume 18
February — June 1972

PUBLISHED BIMONTHLY

American Elsevier Publishing Company, Inc.
NEW YORK

Combustion and Flame is published bi-monthly by American Elsevier Publishing Company, Inc., 52 Vanderbilt Avenue, New York, N. Y. 10017. Copyright © 1972 by the Combustion Institute. *Subscription Price.* 1972 (Vols. 18 and 19, 6 issues): \$52.00. Vols. 14-17 (1970-71): \$26.00 per volume. Subscription orders and notification about changes of address should be sent to the office of the publisher, attention, *Subscription Department*. Claims for missing issues will be honored only six months from the date of issue. Inquiries about Vols. 1-13 (1957-1969) should be addressed to Butterworths, 88 Kingsway, London W.C. 2, England. Combustion and Flame

THE JOURNAL OF THE COMBUSTION INSTITUTE

Volume 19

August — December 1972

PUBLISHED BIMONTHLY

American Elsevier Publishing Company, Inc.

NEW YORK

Some papers to appear in forthcoming issues

L. BLEDJIAN

Computation of Time Dependent Laminar Flame Structure

H. YAMAMURA and K. SAITO

Microwave Reflection from Detonation Waves in Equimolar $C_2H_2-O_2$ at Low Pressures

R. LIAUGMINAS, H. O. BARTHEL, and R. A. STREHLOW

Mach Stem Structure in Exothermic Systems

M. FARBER and R. D. SRIVASTAVA

A Mass Spectrometric Investigation of Reactions Involving Tungsten and Molybdenum with Potassium Seeded H_2/O_2 Flames

M. FARBER and R. D. SRIVASTAVA

A Mass Spectrometric Investigation of Reactions Involving Vanadium with Potassium Seeded H_2/O_2 Flames

B. A. FEAY and J. R. BOWEN

A Model of the Ignition of Cylindrically Confined Explosive Gas Mixtures

P. W. M. JACOBS and (the late) J. STEVENSON

The Gas-Phase Reaction of Perchloric Acid with Ethylene

R. N. NEWMAN and F. M. PAGE

Dispersion of Spray Droplets in Flames

H. PHILLIPS

The Use of a Thermal Model of Ignition to Explain Aspects of Flameproof Enclosure

J. B. HOMER and M. M. SUTTON

Nitric Oxide Formation and Radical Overshoot in Premixed Hydrogen Flames

G. E. ANDREWS and D. BRADLEY

Determination of Burning Velocity by Double Ignition in a Closed Vessel

J. CHOMIAK

Flame Turbulence Interaction

S. HELLEM and A. WILLIAMS

The Rate of Combustion of Single Droplets of Sulphur (Brief Communication)

A. NAKAKUKI

Flame Velocity on the Surface of Volatile Liquids (Brief Communication)

Combustion and Flame is published bi-monthly by American Elsevier Publishing Company, Inc., 52 Vanderbilt Avenue, New York, N. Y. 10017. Copyright © 1972 by the Combustion Institute. *Subscription Price*. 1972 (Vols. 18 and 19, 6 issues): \$52.00. Vols. 14-17 (1970-71): \$26.00 per volume. Subscription orders and notification about changes of address should be sent to the office of the publisher, attention, *Subscription Department*. Claims for missing issues will be honored only six months from the date of issue. Inquiries about Vols. 1-13 (1957-1969) should be addressed to Butterworths, 88 Kingsway, London W.C. 2, England. The journal exists for the publication of experimental and theoretical investigations of combustion phenomena and closely allied matters. Among the subjects emphasized are: atmospheric pollution from combustion; combustion in practical systems; deflagration and detonation waves; electrical aspects of flames; experimental techniques; fire phenomena; flame ignition, inhibition, propagation, stability and structure; fluid dynamics and combustion; heat transfer and radiation; heterogeneous combustion; kinetics and mechanisms of combustion reactions; limits of flammability and of spontaneous ignition; modeling and scaling in combustion processes; new applications of combustion; propellants; sooting; spectra; supersonic reacting flow; thermal decomposition processes; thermochemistry and thermodynamics; transient species; transport properties and turbulence in flames. Critical reviews of current work will be invited. Relevant books will be reviewed. Announcements, Notices, and Reports of Combustion Institute meetings will be published whenever possible.
